

GEN AUDIUS LLC

REQUEST FOR INFORMATION & QUOTATION

Licensed Tropical Latin Music and Singing-Voice Datasets for QAMUZ

Pilot acquisition: 50, 100, and 300 hours | Commercial generative-AI training

Prepared by	Contact	Issued	Response requested
Gen Audius LLC / QAMUZ	info@genaudius.com	August 4, 2026	Within 14 calendar days

Purpose Gen Audius LLC is evaluating ethically sourced, rights-cleared datasets to train QAMUZ, its flagship brand and commercial music-generation platform. The immediate priority is tropical Latin music; a separate symbolic MIDI program will cover broader genres.

1. Company and project overview

Legal entity: Gen Audius LLC

Brand and product: QAMUZ - the flagship public-facing brand and multilingual generative music platform of Gen Audius LLC

Current focus: Long-form music generation, musical structure, singing voices, accompaniment, and cover-art workflows, developed initially with local models.

Procurement objective: Secure for Gen Audius LLC a commercially usable pilot dataset with documented provenance, artist consent, and rights broad enough to train, fine-tune, evaluate, deploy, and improve QAMUZ generative models.

2. Requested tropical Latin scope

Genre family	Target share	Desired coverage
Bachata	35%	Traditional, modern, urban; male/female leads, choruses, future duets
Salsa	20%	Romantica, dura, son-based, contemporary arrangements
Merengue	15%	Traditional, orchestral, mambo and contemporary
Cumbia	10%	Caribbean, Colombian and modern regional variants
Son / bolero / guaracha	10%	Foundational tropical harmony, rhythm and phrasing
Tropical fusion	10%	Latin pop, Afro-Caribbean and modern crossover

- Please quote three pilot tiers: approximately 50, 100, and 300 usable hours after quality control.
- Indicate how much content is exclusive, non-exclusive, synthetic, human-performed, previously released, or commissioned.
- Provide country/region representation and Spanish-language/dialect coverage.

3. Required data package

- Full-length masters in lossless WAV (preferred 44.1 or 48 kHz; 24-bit where available).
- Stems where available: lead vocal, backing vocals, percussion, bass, guitars, keys, brass, strings and other instruments.
- Authorized lyrics and time-aligned lyric segments where available.
- Metadata: genre, subgenre, mood, BPM, key, meter, language, territory, instrumentation, vocal configuration and arrangement structure.
- Train/validation/test recommendations and duplicate or near-duplicate identifiers.
- Checksums, manifest files and stable internal track identifiers.
- A small evaluation sample before contract execution.

4. Singing-voice requirements

Category	Requested information
Voice coverage	Male, female, backing chorus and duet-capable material; voice type/range tags preferred.
Consent	Written performer consent for AI/ML training and commercial generative outputs.
Identity restrictions	Disclose restrictions on artist name, likeness, voice cloning, impersonation and publicity rights.
Technical assets	Dry/wet vocal stems, isolated phrases, full performances, lyrics, phoneme or word timing if available.

Category	Requested information
Language	Spanish is the priority; identify Caribbean regional pronunciation and any bilingual content.

5. Rights and licensing requirements

The proposal should explicitly confirm whether the license permits each of the following:

- Commercial machine-learning training, fine-tuning, validation, evaluation and repeated retraining.
- Creation and commercial exploitation of model outputs by Gen Audius LLC and QAMUZ users.
- Internal storage, preprocessing, feature extraction, segmentation, augmentation and format conversion.
- Deployment of trained models through web applications, APIs, mobile products and enterprise integrations.
- Distribution or hosting of trained weights and adapters, including through cloud infrastructure and private customer deployments.
- Worldwide use, stated term, renewal terms, termination effects and treatment of models trained before termination.
- Coverage of master, composition, lyrics, performer consent, neighboring rights, publicity/voice rights and all necessary sublicenses.
- Representations, warranties, provenance records, audit support, takedown process and indemnification.

6. Pricing questionnaire

Pricing item	Vendor response requested
Pilot tiers	Price for 50, 100 and 300 usable hours; minimum commitment.
Asset premiums	Separate pricing for stems, MIDI, lyrics, annotations and isolated vocals.
License model	Perpetual vs. term-limited; exclusive vs. non-exclusive; renewal/escalation.
Usage scale	Limits tied to users, revenue, compute, models, products or generated outputs.
Royalties	Any recurring fees, output royalties, revenue share or reporting duties.
Updates	Pricing and cadence for future catalog refreshes or incremental deliveries.
Evaluation	Availability and terms of a small sample or paid proof of concept.

7. Vendor response checklist

1. Company and primary licensing contact.
2. Available hours/tracks by requested genre and voice configuration.
3. Example manifest and metadata dictionary.
4. Rights chain and consent documentation summary.
5. Proposed license scope and a sample agreement.
6. Pricing for all three pilot sizes and optional assets.
7. Delivery method, estimated schedule and technical support.
8. Known exclusions, restrictions and indemnification limits.

8. Evaluation criteria

Criterion	Weight	What Gen Audius LLC will evaluate
Legal clarity and provenance	30%	Documented rights, consent, commercial scope and indemnity for Gen Audius LLC
Tropical Latin relevance	25%	Genre authenticity, regional breadth and arrangement quality
Audio and annotation quality	20%	Lossless sources, stems, metadata and consistency
Voice diversity	10%	Male/female leads, choruses, duet material and Spanish coverage
Price and scalability	10%	Pilot affordability and growth path
Delivery and support	5%	Speed, documentation and technical responsiveness

9. Initial vendor-specific inquiry messages

GCX / Rightsify

Contact: team@gcx.co

Subject: Licensed tropical Latin dataset for Gen Audius LLC / QAMUZ

Gen Audius LLC is evaluating a rights-cleared tropical Latin music dataset for QAMUZ, our commercial generative-AI music brand and platform. Please quote 50-, 100-, and 300-hour pilots focused on bachata, salsa, merengue, cumbia, son/bolero/guaracha, and tropical fusion. We prefer full-length lossless WAV, stems, lyrics, MIDI where available, rich metadata, singing-voice consent, commercial model deployment, and permission to host trained weights/adapters. Please review the attached RFI and advise availability, pricing, sample access, and license terms.

SIGNAL.DAT

Contact: Contact Curation Team

Subject: Custom tropical Latin catalog and commercial training license

Gen Audius LLC is assessing a tropical Latin pilot dataset for QAMUZ, our flagship music-generation brand. We are interested in your commercial training catalog and custom curation, particularly bachata, salsa, merengue, cumbia and related styles. Please confirm exact track/hour coverage, whether audio and stems are delivered or the product is metadata-only, rights provenance, voice-consent coverage, and pricing for 50-, 100-, and 300-hour equivalents. The attached RFI contains our technical and licensing requirements.

Sonovox

Contact: Official licensing contact

Subject: Spanish singing-voice dataset for tropical Latin music

We are seeking licensed Spanish singing-voice data for a commercial tropical Latin music model. Our priorities are male and female leads, backing choruses, duet-capable performances, dry/wet stems, full-length phrases or songs, lyrics/timing, Caribbean Spanish coverage, and explicit AI-training consent. Please provide catalog size, voice distribution, perpetual-license terms, restrictions on identity imitation, pricing, and an evaluation sample. The attached RFI provides the broader project context.

LANDR Fair Trade AI

Contact: Business / AI partnerships

Subject: Developer access to rights-verified tropical Latin catalog

Gen Audius LLC would like to explore licensing a custom subset of LANDR's opt-in Fair Trade AI catalog for QAMUZ, our flagship music-generation brand. We seek tropical Latin recordings, especially bachata, salsa, merengue and cumbia, with clear recording/publishing rights and permission for commercial AI training and outputs. Please advise whether developer dataset licensing is currently available, approximate eligible catalog coverage, term/perpetual options, pricing and the appropriate partnership contact.

10. Resumen interno (español)

Este documento solicita cotizaciones comparables a nombre de Gen Audius LLC sin revelar un presupuesto. QAMUZ se presenta como la marca y el producto principal de la compañía. La prioridad es obtener derechos claros para entrenar, desplegar y comercializar QAMUZ, incluyendo los pesos

resultantes. Antes de firmar, Gen Audius LLC debe revisar el contrato con asesoría jurídica especializada en propiedad intelectual y derechos musicales.

- No aceptar una licencia de sincronización normal como sustituto de una licencia explícita para entrenamiento de IA.
- Confirmar por separado máster, composición, letra, interpretación, voz/publicidad y sublicencias.
- Comenzar con una muestra de evaluación y un piloto pequeño antes de adquirir 300 horas.
- Mantener el dataset tropical separado del futuro corpus MIDI multigénero.
